NUSSEr Stadtmöbel has grown continuously since the acquisition of the BECK company in 2002. Today the NUSSEr Stadtmöbel group of companies consists of the Nusser Stadtmöbel GmbH & Co KG, the Beck GmbH & Co KG and the ODM Stadtmöbel GmbH & Co KG. Recently the Stausberg Stadtmöbel GmbH has been acquired to serve the Austrian market.

Our product portfolio of public space furniture like benches, litter bins, bicycle stands and pollards has been expanded continuously and is among the most comprehensive and attractive in the industry. In this brochure we are presenting, across all Stadtmöbel companies, the latest product developments for 2016/17.

Nusser, for example, is introducing the TRIGO bench with a newly designed concrete stand that can be assembled in multi bench arrangements. Beck is introducing a solar powered level indicator for litter bins. This allows the communities waste management to only service those bins with a high degree of fill at significant cost savings. ODM shows very strong stainless steel benches in attractive designs.

Please roam our website www.stadtmoebel.de. You will find our smart "Produktnavigator" to guide you to the products you are searching for. If you prefer, please ask for our catalogues.

Jörg W. Nusser Ulrich Träger

BECK has developed a solar powered level indicator for litter bins. The system reports via email or SMS the degree of fill of each litter bin. This allows the communities waste management to only service those bins with a high degree of fill at significant cost savings.

Each individual litter bin is equipped with a level indicator reporting the actual level on a regular basis. The level indicator has an ultrasonic sensor. The system is connected with the internet. After a certain level of waste is reached at any individual bin, an alert is sent via the cell phone system in form of an SMS or email. Also, in case of a malfunction of the components, the system sends an alert.

The application of the SOLAR POWERED LEVEL INDICATOR is best suited for the BECK litter bins Type A7 CITYround and A10 CITYnorm. Please contact us for more details.

- **Automated reporting of waste level in litter bins via email or SMS**
- **Efficient removal of waste based on waste level**
- **Models A7 CITYround and A10 CITYnorm are most suitable for this technology**
- **Helps communities to service litter bins at significant cost savings**
- **Independent of electricity with solar panels**

Issued October 2016

NUSSER BENCH TRIGO I

NUSSER TRIGO I

Bench TRIGO I has the stand in line with the slats.
Bench with stands made of fair-faced concrete.
The stands are equal length L-shaped and can be surface mounted.
Seating is FSC® hardwood or Douglas fir.

Design: A. Rayer

TRIGO I

Length 213 x 44,5 cm
Height 47 cm
Profile of slats 5,5 x 5,5 cm

NUSSER BENCH TRIGO II

NUSSER TRIGO II

Bench TRIGO II has the stands at a 45 degree angle. The stands are equal length L-shaped and can be surface mounted. It can be arranged in a modular fashion to fit the landscape or the architects design. Seating is FSC® hardwood or Douglas fir.

Design: A. Rayer

TRIGO II

Length 200 x 47,5 cm

Height 47 cm

Profile of slats 5,5 x 5,5 cm

NUSSER BENCH **BASE**

NUSSER BASE with / without backrest

Solid bench with heavy concrete stands.
Available with or without backrest.
Seating is FSC® hardwood or Douglas fir.

Design: eckedesign

Length 200 x 50 cm
Height 47 cm
Profile of slats 19 x 4,5 cm

NUSSER BENCH **TUBO**

NUSSER TUBO

Bench with a tubular frame and anchors for embedding.
The frame is manufactured with a sophisticated bending technique.
Frame is hot dip galvanized, optionally powder coated.
Seating is FSC® hardwood or Douglas fir

Design: Wehrmann

Length 200 cm
Height 47 cm
Profile of slats 6 x 3,5 cm

NUSSER IN-LINE BENCH **LIGUS**

NUSSER In-Line Bench LIGUS for the Landesgartenschau in Öhringen

Custom made bench based on the LIGUS bench to follow a curved line. Individual sections are cut to fit the winding layout. Frame is hot dip galvanized, optionally powder coated. Seating is FSC® hardwood or Douglas fir.

NUSSER BENCH **LIGUS II**

NUSSER LIGUS II with backrest

Bench based on the LIGUS bench with a stand for embedding. Bench with frame made from flat bar steel, hot dip galvanized, optionally powder coated in DB 703 (dark metallic gray). Type of wood: FSC® hardwood or Douglas fir.

Length 200 cm
Height 47 cm
Profile of slats 6 x 4,5 cm

NUSSER BENCH **DESSAU LIGHT**

NUSSER DESSAU light

Bench with horizontal slats and a frame made of 8 mm sheet metal connected with trusses for sturdiness and strength. Frame is hot dip galvanized and powder coated. Seating available in FSC®-hardwood or Douglas fir.

Length 192 cm
Height 44 cm
Dimension of slats 10 x 4,5 cm

NUSSER DUAL – LITTER BIN **V 70** FOR SEPARATION OF WASTE

Nusser Dual – Litter Bin V 70 for separation of waste

Rectangular body with a flat top and square opening. Capacity is 2 x 70 liters. This litter bin can be mounted to the floor or free standing. The top can be opened for the removal of garbage. Length x Width approx. 48 x 82 cm
Height 75 cm
Profile of slats 5,5 x 2,5 cm

ODM STAINLESS STEEL BENCH B480V

ODM B480V – with and without backrest

Manufactured predominantly in Stainless steel tubing, this bench is comfortable and very sturdy.
The seating is slightly curved for comfort.
The stainless surfaces are shot-peened and electro polished.
The armrest is optional.
The bench can be either embedded or surface mounted.

Bench with backrest
B480V-SRRML for embedding
B480V-BRRML for surface mounting

Bench without backrest
B480V-SRROL for embedding
B480V-BRROL for surface mounting

ODM STAINLESS STEEL BENCH B5000V

Bench B5000V – The bench that can be stacked

Stackable bench, movable, made of stainless steel tube, stainless surfaces are shot-peened and electro polished, with plastic slats and with backrest. Bench is specially suited for sightseeing ships or other places, where low weight and flexibility is required.

B5000V-MKUML with backrest

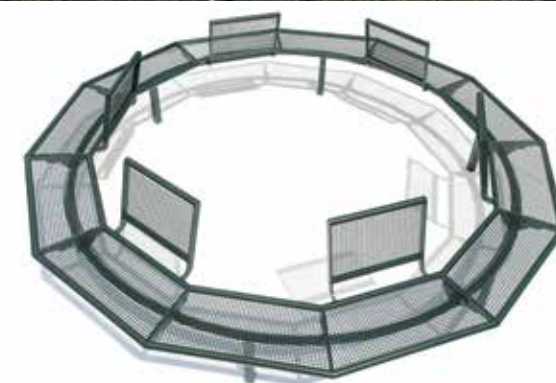

ODM WIRE MESH CIRCULAR BENCH B300

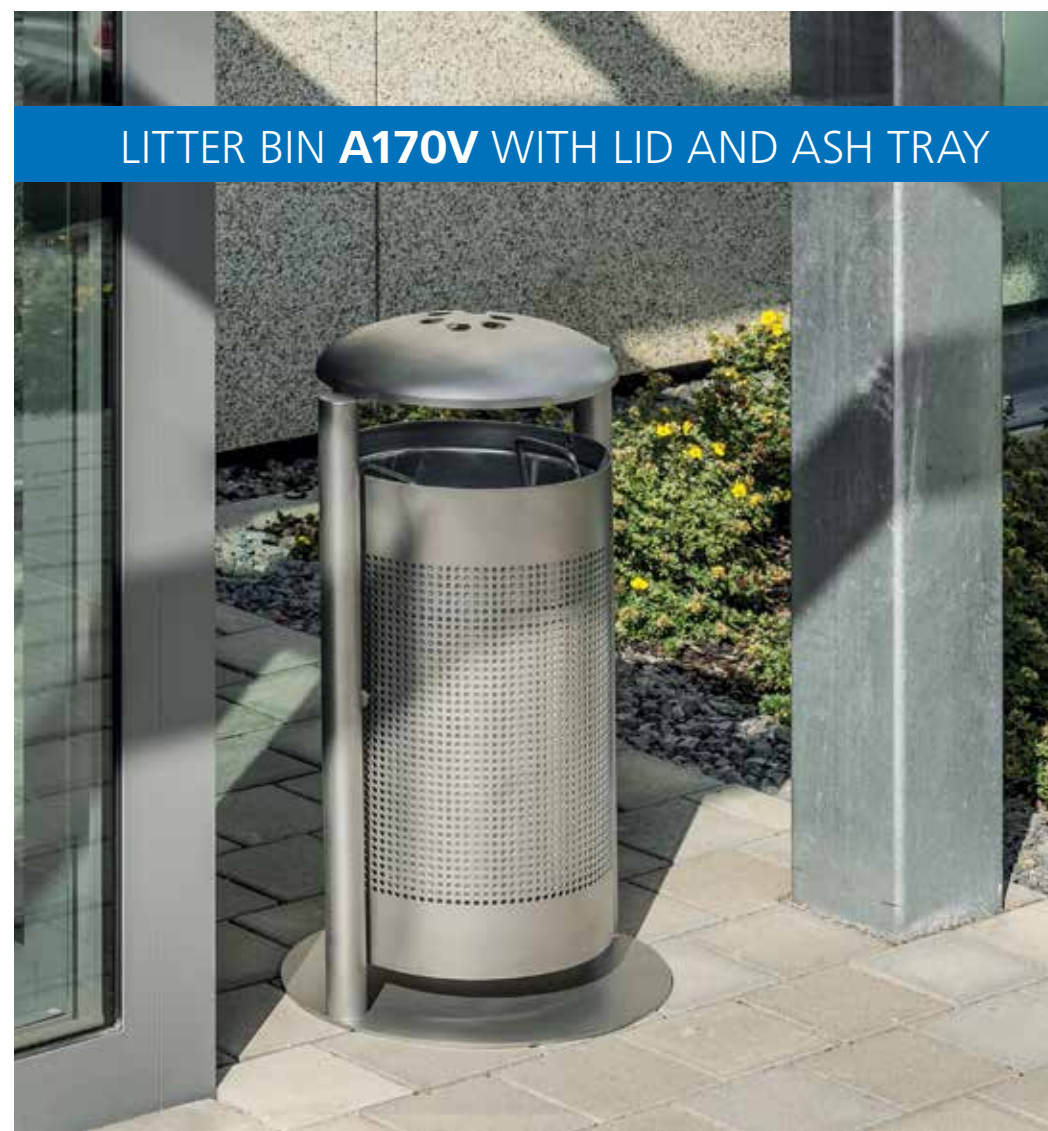

Bench B300 – Circular Bench

This circular bench is variable in diameter and the individual seats are arranged in a polygon. Seating material is wire mesh. The bench is made of steel, galvanized and powder coated. The individual seating elements can be equipped with a backrest. The frame must be embedded.

Bench with or without backrest
B300S-SDGML-R with backrest
B300S-SDGOL-R without backrest

LITTER BIN A170V WITH LID AND ASH TRAY

Litter Bin A170V with lid and Ash Tray

Litter Bin A170V with an ash tray in the lid, stainless steel, surfaces are shot-peened and electro lid polished, capacity is 50 l, body is perforated, moveable or can be embedded, support is round tube 48 x 3 mm.

Capacity 50 Liters
Height 90 cm
Diameter 35 cm

ODM STAINLESS STEEL BENCH B490V

ODM B490V With partial length Backrest

The bench is manufactured predominantly from Stainless steel tubing. A partial length backrest can be positioned left, right or in the middle. Also, two backrests can be positioned offset and opposite to each other. The stainless surfaces are shot-peened and electro polished. The bench can be either embedded or surface mounted.

Bench with or without backrest
B490V-SRRML with backrest for embedding
B490V-SRROL without backrest for embedding

B490V-BRRML with backrest for surface mounting
B490V-BRROL without backrest for surface mounting

BECKropa SERIE F15

BECKropa Serie F15

Scooter rack for five Scooters.
Base is hot dip galvanized and for surface mounting.
A wooden bar will fix the scooters.

Height x Width approx. 410 x 1.000 mm

BECK EUbox Serie A16
The design surprises with a tapered body and with a slim square tube stand.
The litter bin has rounded corners and the deposit opening is in the front door.
